

ADVANCES WITH FIELD EXPERIMENTS
VIRTUAL CONFERENCE
SEPT. 23-24, 2020

KEYNOTE SPEAKERS

ORIANA BANDIERA

Oriana Bandiera is the Sir Anthony Atkinson Professor of Economics and the Director of the Suntory and Toyota Centre for Economics and Related Disciplines at the London School of Economics, and a fellow of the British Academy, the Econometric Society, CEPR, BREAD and IZA. She is vice-president of the European Economic Association, and director of the Gender, Growth and Labour Markets in Low-Income Countries program and of the research program in Development Economics at CEPR.

She is co-editor of *Microeconomic Insights* and *Economica*. Her research focuses on how monetary incentives and social relationships interact to shape individual choices within organizations and in labor markets. Her research has been awarded the IZA Young Labor Economist Prize, the Carlo Alberto Medal, the Ester Boserup Prize, and the Yrjö Jahnsson Award.

LARRY KATZ

Lawrence F. Katz is the Elisabeth Allison Professor of Economics at Harvard University and a Research Associate of the National Bureau of Economic Research. His research focuses on issues in labor economics and the economics of social problems. He is the author (with Claudia Goldin) of *The Race between Education and Technology* (Harvard University Press, 2008), a history of U.S. economic inequality and the roles of technological change and the pace of educational advance in affecting the wage structure.

Katz also has been studying the impacts of neighborhood poverty on low-income families as the principal investigator of the long-term evaluation of the Moving to Opportunity program, a randomized housing mobility experiment. He graduated from the University of California at Berkeley in 1981 and earned his Ph.D. in Economics from the Massachusetts Institute of Technology in 1985.

ULRIKE MALMENDIER

Ulrike Malmendier is Professor of Finance, Professor of Economics, and Edward and Mollie Arnold Chair at the University of California, Berkeley. One of the top financial scholars in academia, she won the prestigious Fischer Black Prize from the American Finance Association for best finance researcher under 40 in 2013. She has been teaching at UC Berkeley since 2006 and is the founding co-chair of the Initiative in Behavioral Finance and Economics.

Malmendier's research lies in the intersection of economics and finance, specifically how individuals make mistakes and systematically biased decisions. Her work includes research on CEO overconfidence, the long-term frugality of "Depression babies," and the decision-making behind gym membership. She has recently been interested in the impact of economic shocks on later economic behavior of individuals who lived through these periods.

ORGANIZERS

JOHN LIST

John A. List is the Kenneth C. Griffin Distinguished Service Professor in Economics at the University of Chicago. List joined the UChicago faculty in 2005; prior to that he was a professor at the Univ. of Central Florida, Univ. of Arizona, and Univ. of Maryland. His research focuses on questions in microeconomics, with an emphasis on using field experiments to address both positive and normative issues. For decades his research has focused on issues related to the inner-workings of markets, the effects of incentives schemes on market equilibria and allocations, how behavioral economics can augment the standard economic model, on early childhood education and interventions, and most recently on the gender earnings gap in the gig economy. His research includes over 200 peer-reviewed journal articles and several published books, including the 2013 international best-seller, *The Why Axis: Hidden Motives and the Undiscovered Economics of Everyday Life* (with Uri Gneezy).

ROBERT METCALFE

Robert Metcalfe is a Visiting Associate Professor in Economics at the University of Southern California and an Assistant Professor in Markets, Public Policy, and Law at the Questrom School of Business, Boston University. He was previously a Postdoctoral Research Scholar in Economics at the University of Chicago. Rob's research lies within applied microeconomics, with a focus on energy markets, transportation, firm and labor productivity, and digital platforms. His work has been featured in the *Harvard Business Review*, *Wall Street Journal*, and *Financial Times*. He has worked with many organizations such as Uber, Lyft, Virgin Atlantic Airlines, Opower, Oracle, and British Telecom. He completed his M.Sc. and Ph.D. at the London School of Economics and Imperial College London, respectively. He is also a co-founder of two start-up companies. You can read more about his research at www.rmetcalfe.net.

#AFE2020

**ADVANCES WITH FIELD EXPERIMENTS
VIRTUAL CONFERENCE**

September 23-24, 2020

Recent years have seen an enormous increase and interest in academic research using experimental methods in the field to address questions across a broad range of topics in economics. Moreover, businesses and governments across many countries around the world are starting to appreciate the power that field experiments can have on the design of products, services, and policies.

The Advances with Field Experiments 2020 virtual conference will have a different format this year, but it will still include a group of academics presenting the best and most innovative new work using field experiments to address economic questions.
